

Diabetes Awareness Community Drama Project

CBME Competency-Based Learning Activity

Project Overview

Title: "Sugar Shadows" - Diabetes Awareness Street Drama **Duration:** 3-day community intervention project
Student Team: 6 MBBS students (3 groups of 2) **Target Audience:** Rural community (300-500 people) **CBME Focus:** Community engagement, health education, advocacy skills

Learning Objectives (CBME Aligned)

Patient Care (PC)

- PC2: Educate communities about diabetes prevention
- PC5: Partner with communities to address health needs

Communication Skills (CS)

- CS2: Family and community discussions
- CS3: Interprofessional teamwork for health promotion

Systems-Based Practice (SBP)

- SBP3: Quality improvement through community interventions

Professionalism (PRO)

- PRO2: Cultural competence in health education
-

Project Structure (3 Days)

Day 1: Planning & Preparation

Time: 8:00 AM - 5:00 PM **Location:** College campus/community center

Activities:

1. **Team Formation:** 6 students divided into 3 teams
 - Writing team (2 students)
 - Acting team (2 students)
 - Production team (2 students)
2. **Community Assessment (2 hours):**
 - Local diabetes prevalence data

- Cultural beliefs about diabetes
- Preferred communication styles
- Existing health programs

3. **Script Development (3 hours):**

- Identify key messages
- Create relatable characters
- Include local cultural elements
- Balance education with entertainment

4. **Rehearsal Preparation (2 hours):**

- Basic acting techniques
- Voice projection training
- Props and costume discussion

Day 2: Rehearsal & Refinement

Time: 9:00 AM - 6:00 PM **Location:** Community open space

Activities:

1. **Full Script Read-through (2 hours)**
2. **Blocking and Movement (2 hours)**
3. **Props and Costumes Creation (2 hours)**
4. **Cultural Adaptation Session (2 hours)**
 - Local language consultant invited
 - Community elder feedback session

Day 3: Performance & Evaluation

Time: 6:00 PM - 10:00 PM **Location:** Village community center

Activities:

1. **Evening Performance (1 hour)**
2. **Interactive Q&A Session (1 hour)**
3. **Post-performance Survey (1 hour)**
4. **Community Feedback Collection (1 hour)**

Drama Script Template

Act 1: The Hidden Danger (10 minutes)

Scene: Rural village courtyard

Characters:

- Ramu: 45-year-old farmer (diabetic, unaware)
- Lakshmi: His wife (concerned but traditional)
- Dr. Sharma: Local health worker
- Village elders

Key Messages:

- Early symptoms of diabetes often ignored
- Family history increases risk
- Importance of regular health check-ups

Plot Points:

- Ramu complains of fatigue, frequent urination
 - Wife notices changes in behavior
 - Village elder shares family history
 - Health worker explains need for testing
-

Act 2: The Diagnosis Journey (12 minutes)

Characters: (Previous + doctor and family)

Key Messages:

- Different types of diabetes tests
- Emotional aspects of diagnosis
- Importance of family support
- Need for lifestyle changes

Plot Points:

- Visit to health camp
 - Anxiety during testing
 - Breaking the diagnosis news
 - Family reactions and support
-

Act 3: Living with Diabetes (13 minutes)

Characters: (All above + pharmacist, neighbor)

Key Messages:

- Medication adherence
- Dietary modifications
- Regular exercise
- Foot care and complication prevention
- Regular follow-up importance

Plot Points:

- Learning about medications
 - Dietary changes with family meals
 - Exercise routine development
 - Complication warning signs
 - Hopeful outlook on management
-

Act 4: Community Action (5 minutes)

Finale with community involvement

Key Messages:

- Prevention through healthy lifestyles
 - Community screening importance
 - Support systems for diabetics
 - Breaking stigma around diabetes
-

CBME Assessment Rubric

Criteria 1: Community Relevance (20%)

- **Excellent:** Script reflects local culture, language, beliefs
- **Good:** Most elements culturally appropriate
- **Developing:** Some cultural elements included
- **Poor:** No cultural adaptation

Criteria 2: Educational Accuracy (25%)

- **Excellent:** All medical information scientifically accurate
- **Good:** Minor inaccuracies, major points correct
- **Developing:** Some misinformation present
- **Poor:** Significant medical errors

Criteria 3: Performance Quality (20%)

- **Excellent:** Confident, engaging, clear delivery
- **Good:** Adequate performance, good voice projection
- **Developing:** Hesitant delivery, poor enunciation
- **Poor:** Unable to complete performance

Criteria 4: Interactive Engagement (15%)

- **Excellent:** Actively involved audience, answered questions
- **Good:** Good Q&A session post-performance
- **Developing:** Minimal audience interaction
- **Poor:** No community engagement

Criteria 5: Project Management (20%)

- **Excellent:** Well-organized, met all deadlines, effective teamwork
 - **Good:** Adequate organization, good team coordination
 - **Developing:** Poor time management, team conflicts
 - **Poor:** Complete lack of organization
-

Materials & Resources Needed

Script Development:

- Local language expert consultation
- Medical accuracy review by faculty
- Cultural sensitivity consultation
- Music and sound effects equipment

Production:

- Simple costumes (saris, traditional wear)
- Basic props (fake glucometer, medicine bottles)
- Sound system with speakers
- Stage lighting (generators if power unavailable)

Logistics:

- Transportation to village
 - Permission from local panchayat
 - Evening snacks for performers
 - Backup plan for weather contingencies
-

Student Roles & Responsibilities

Project Coordinator (Faculty Supervised):

- Overall planning and coordination
- Community liaison and permissions
- Emergency management
- Final evaluation coordination

Writing Team:

- Script development and medical accuracy
- Cultural adaptation and language check
- Character development and dialogue
- Educational message integration

Acting Team:

- Character assignments and practice
- Voice training and projection

- Body language and emotion expression
- Audience engagement techniques

Production Team:

- Props and costume procurement
 - Sound and lighting arrangement
 - Stage setup and breakdown
 - Photography and documentation
-

Risk Assessment & Mitigation

Health & Safety:

- Performer heat exhaustion (shade, water)
- Electrical equipment safety
- Crowd management to prevent stampedes
- Emergency medical kit availability

Cultural Sensitivity:

- Script review by cultural consultants
- Religious practices consideration
- Gender-specific staging areas if needed
- Respect for local traditions

Logistical Risks:

- Weather disruption (covered space requirement)
 - Equipment failure (backup systems)
 - Late arrival (buffer time in schedule)
 - Community non-cooperation (alternate engagement methods)
-

Evaluation Methods

Formative Evaluation:

- Daily reflections by students
- Script review by faculty mid-week
- Dress rehearsal feedback
- Mock audience testing

Summative Evaluation:

- Community impact assessment survey
- Student self-reflective reports
- Faculty observation ratings
- Peer assessment of team performance

Impact Measurement:

- Knowledge retention quiz (pre/post)
 - Audience engagement metrics
 - Social media reach if recorded
 - Follow-up community screening attendance
-

Expected Outcomes

Student Learning:

- Enhanced communication skills
- Cultural competence development
- Teamwork and project management
- Creative problem-solving abilities

Community Impact:

- Increased diabetes awareness
- Reduced stigma around diabetes
- Improved health-seeking behaviors
- Enhanced community-physician relationships

Institutional Benefits:

- Community engagement model development
 - Medical education innovation
 - Local health system strengthening
 - Research opportunities for quality improvement
-

Budget Estimate

Personnel:

- Local volunteers for audience: ₹2,000
- Transportation: ₹3,000
- Refreshments: ₹4,000

Materials:

- Props and costumes: ₹5,000
- Sound system rental: ₹3,000
- Stationery and printing: ₹2,000

Miscellaneous:

- Emergency fund: ₹5,000
- Documentation equipment: ₹2,000

Total Estimated Budget: ₹26,000 *(To be adjusted based on institutional guidelines)*

Timeline Template

Week 1: Planning

- | Day 1: Team formation, community assessment
- | Day 2: Script writing and medical review
- | Day 3: Initial rehearsal and faculty feedback

Week 2: Development

- | Day 4-5: Full rehearsal and blocking
- | Day 6: Cultural adaptation and community consultation
- | Day 7: Technical setup and final dress rehearsal

Week 2: Execution & Evaluation

- | Evening: Performance and Q&A
- | Next day: Community survey and impact assessment
- | Week 3: Project report and reflection submission

Faculty Mentoring Guidelines

Project Supervisor Responsibilities:

- Initial planning guidance
- Medical accuracy oversight
- Cultural sensitivity reviews
- Performance attendance and feedback
- Final assessment coordination

Student Support Strategies:

- Weekly mentoring sessions
 - Technical skill workshops
 - Community navigation guidance
 - Ethical consideration discussions
 - Emergency protocol training
-

Success Metrics

Quantitative Measures:

- Audience size and engagement duration
- Pre/post knowledge assessment scores
- Community screening camp attendance increase

Qualitative Measures:

- Student reflection depth and learning
 - Community feedback quality
 - Cultural acceptance and inclusion
 - Innovation and creativity demonstrated
-
